Abstracts submitted to SQL Saturday

I just submitted abstracts to SQL Saturday #114 in Vancouver and #108 in Redmond.

The Redmond SQL Saturday appears to be the more popular of the two. Who knows if my session will get accepted, but I am giving it a shot.

Using SSRS reports to analyze SQL Server health

Assessing the health of your SQL Server with Several SQL Server Report Server reports designed for DBA's and database developers to diagnose, and locate common pitfalls of SQL Server. This includes reports for Duplicate Indexes, Index Fragmentation, Big Indexes, Backup Status - backup log, Big One Time Use Queries, Queries Needing Parameters and more.
