Sessions Submitted for SQL Saturday #120 Orange County CA

After being approved as a speaker at SQL Saturday 114 - Vancouver BC, and SQL Saturday 108 - Redmond WA, I have decided to give it another shot at SQL Saturday 120 in Orange County California.

I have submitted 2 abstracts for sessions:

The first one is titled Unleashing Common Table Expressions in SQL Server, and if accepted this will be the third time presenting this one on a SQL Saturday.

The next session which I will also be presenting in Vancouver BC is Using SSRS reports to analyze SQL Server health.

I am looking forward to travelling to sunny southern California for these presentations. Nice to get away from the snow and rain for a while.
