

Working on Beta 2 of the Database Health Reports

Beta 2 of the [Database Health Reports](#) will be available in the next 7 to 10 days as I finish it up.

There has been a good acceptance of [Beta 1 so far](#), and with feedback here are some of the things included in the next beta.

- Overall performance tuning, some of the reports run faster now, and some of the summary pages update quicker.
- A new Connections Advisor was added.
- Fixed some SQL Server 2005 compatibility issues.
- Added a Missing Indexes report.

Here is a preview of the new connections advisor that was added for Beta 2.

Beta 2 should be available by September 30, 2012.
