When Corruption Strikes - Online Presentation Wed May 13th

On Wednesday May 13th I will be presenting to the PASS DBA Virtual Chapter Meeting, at Noon Mountain time (convert to your time zone).

The session is titled "**When Database Corruption Strikes**", and the event has been sponsored by Dell Software

Abstract:

You are working along month after month with no problems in your database. Suddenly someone reports that their query won't run. They get an error stating "SQL Server detected a logical consistency-based I/O error", or something even scarier. Do you know what to do now? We will walk through 3 or 4 actual corrupt databases exploring ways to go about finding and fixing the corruption. More importantly we will explore how to prevent further data loss at the time corruption occurs. Learn what things you should do to protect yourself when corruption strikes. Learn what to avoid that will make things worse. You will leave with a checklist of steps to take when you encounter corruption. By the end of this session you will be ready to take on corruption, one database at a time.

Registration:

You must register if you want to attend. You can register at https://attendee.gotowebinar.com/register/4612696835933838081. When you register, you will receive a link to the meeting. All registrants will be included in a drawing for a $50 Amazon gift card.
