Unleashing Common Table Expressions

On the next two Saturdays I will be presenting the Unleashing Common Table Expressions presentation at SQL Saturday 172 in Portland Oregon, and SQL Saturday 166 in Olympia Washington.

As part of refreshing the presentation I have added a few more examples of how CTE's can be used in common practice.

- Using a CTE to parse a Query String.
- Using a CTE to parse a SQL Server Connect String.

Every time I do this presentation I add a few more samples, some of them are new CTE examples that I have come up with since the last presentation, and others are ones that have been suggested by people who have attended one of the sessions.

I have given the Unleashing Common Table Expressions presentation in the past at other events.

- SQL Saturday Redmond WA (2012).
- SQL Saturday Vancouver BC (2012).
- Seattle Code Camp - Redmond WA (2012).
- SQL Lunch UK (2012).
- Multiple on-site company presentations.

I am looking forward to SQL Saturday 172 in Portland Oregon, and SQL Saturday 166 in Olympia Washington. It is going to be a great time.
