SQL Daily Monitoring – SQL Server Versions for February

Here listed is the current percentages of SQL server versions running our Daily Check up with Database Health Monitor.

Compare this month's percentages to Last Month's Percentages

Our SQL Daily Monitoring Service

What does this post mean??

We offer a service called SQL Daily Checkup. The pie chart above represents all of our current customers using our service and what SQL Server versions they are running.

What is this service?

With this service we detect and alert you of any issues that arise on your SQL Server. Then we send you details about this server issue and what it would take to resolve the issue.

What do you get with this service?

- Initial analysis with written details describing your current baseline issues.
- Weekly full email describing all recommendations.
- Monitoring several times each day on issues as they arise on your SQL Server.
- Daily notification on new issues with recommendations on how to resolve.
- Database Health Monitor license full license for all servers being monitored.
