November week 1 class discount wrap up

There are only a couple days left on first SQL Server class discounts for November.

These both expire in the next couple days and will be replaced with different promotions for next week.

40% off SQL Joins Type Class

The JOINS Type class is one of our best selling classes. The standard price is $29.99 USD which is a great price even with no discount. But with the coupon code JOINSNOV, you will get 40% off, you can get the course for just $17.99 USD. An even better value.

In this course, we will cover: basic select, inner join, left outer join, right outer join, semi join, anti semi join, left outer join w/ exclusion, right outer join with exclusion, full outer join, cross join, cross apply, outer apply, equi vs non equi join, two inner joins, full outer join w/ exclusion, inner and outer join, except, intersect and union. Everything that you ever wanted to know about joins but were afraid to ask.

Here is the direct link to the class using the coupon code, valid through November 7th.

Coupon code JOINSNOV .

TSQL Output Clause Class for $2

The SQL Server output clause is a great way to get data back from an insert, update or delete statement, and it cause be used for auditing, or tracking of changes. It is also a great way to capture changes for a type of undo mechanism if needed. One over the more overlooked SQL Server features that can help you write more effective queries.

Here is what a recent student had to say after completing the Output Clause Course:

> The Output Clause one was “new” knowledge for me as I never used/researched it…. I’m using it multiple times per day now.

Greg (Course Student)

Here is the direct link to the class using the coupon code, valid through November 8th.
