SQL Server Performance Tuning for the Bellingham .NET users group

Tonight I had the opportunity to present to the Bellingham .NET users group. About 30 people showed up for the presentation.

SQL Server Performance Tuning and Advanced Query Tuning:

This presentation will include SQL Server performance tuning tips and recommendations for both the developer and the database administrator. Topics covered will include index usage details, query tuning, understanding the procedure cache, and best practices to improve the performance of your SQL Server, and the programs using your SQL Server.
