Using Cursors, followed by Using String Functions

On Thursday March 12th at 9:00am (pacific time), we will be hosting another free training provided by Aaron Buma and I to prepare developers for the Microsoft 70-461 SQL Queries exam. This week we will be a two part session Using Cursors, followed by Using String Functions. This is provided free of charge to give back to the SQL community.

Here is the outline:

- Using Cursors
- Using String Functions

Here is the link to the Google On Air Broadcast where you can watch for free.

https://plus.google.com/events/ci8jms67qttuteegimrf4sj70sk

This session will be about 90 minutes, Aaron Buma will present about half and I will present the other half. After the broadcast is over, it will be made available on YouTube for replay.
