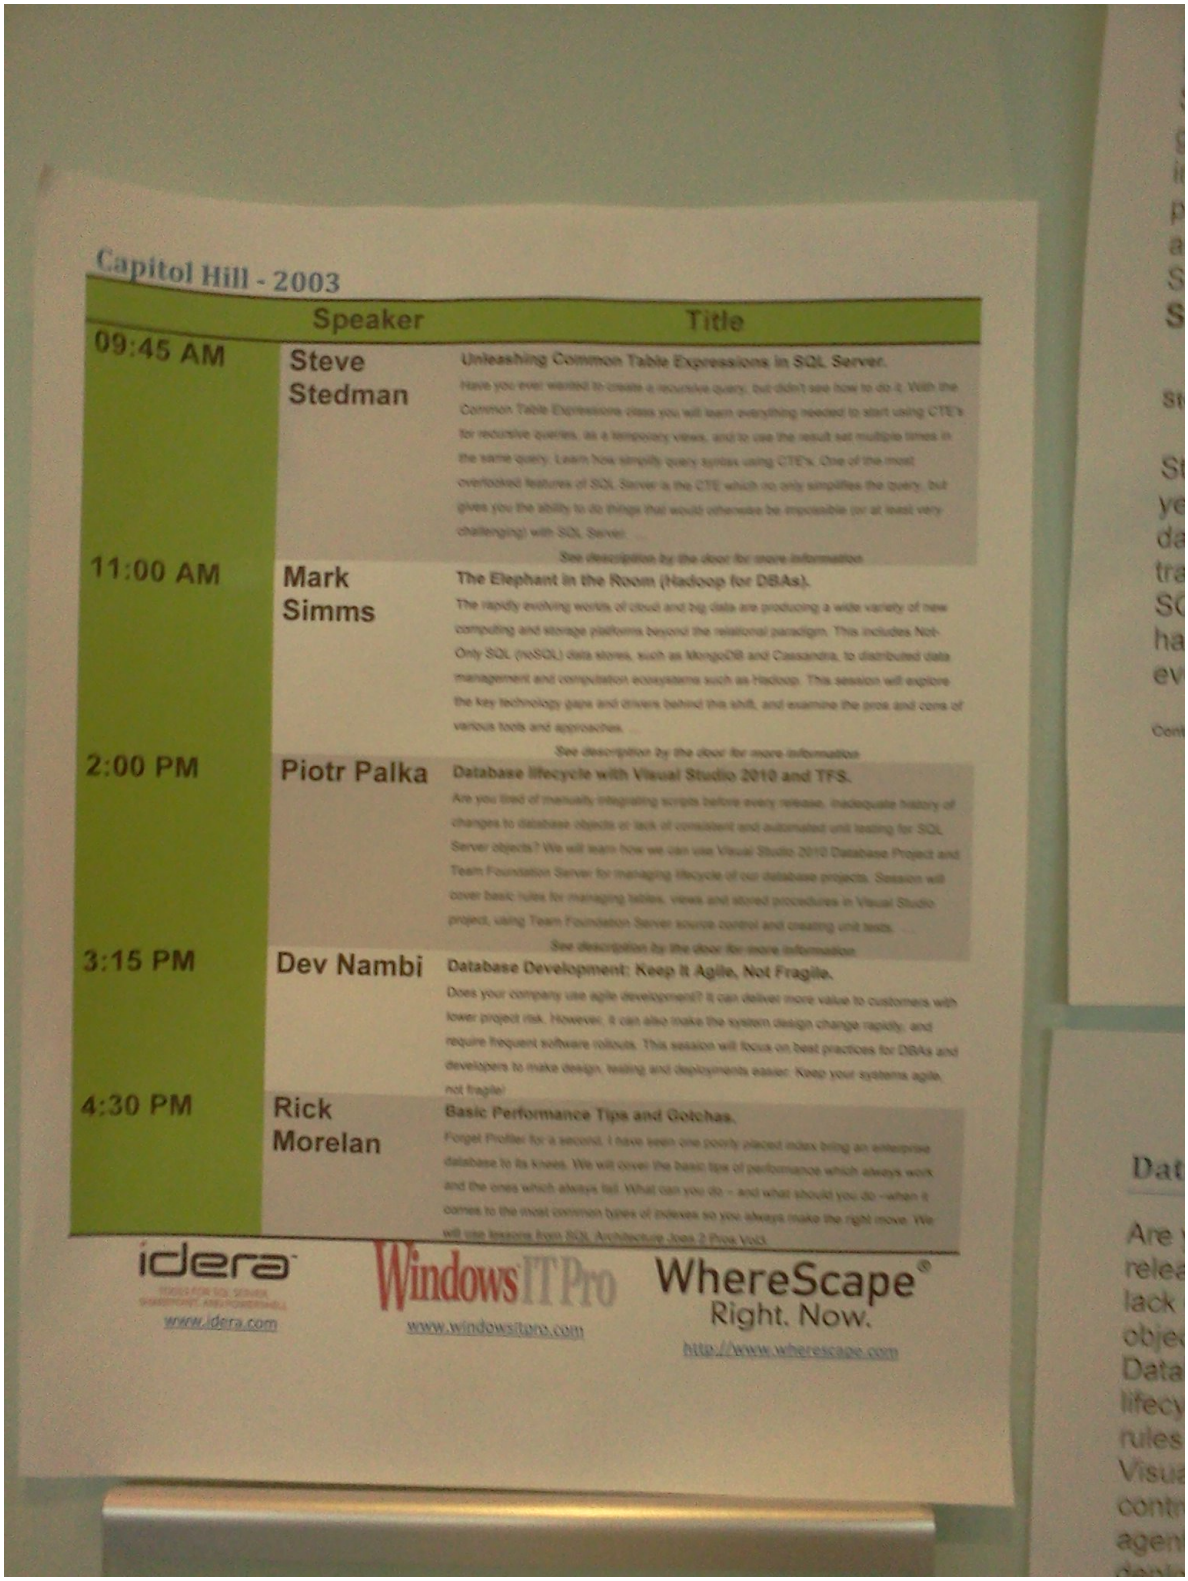
A Great Day at SQL Saturday 108 in Redmond.

WOW, what a great day at SQL Saturday 108 in Redmond. I started out with a keynote presentation from **Buck Woody**. Then I delivered my presentation on Common Table Expressions. Which I think went well. There were some great questions and I look forward to refining my presentation to include some of the questions that I was asked at the end of the session.



Capitol Hill - 2003
Speaker
Title
09:45 AM
Steve Stedman
Unleashing Common Table Expressions in SQL Server.
11:00 AM
Mark Simms
The Elephant in the Room (Hadoop for DBAs).
2:00 PM
Piotr Palka
Database lifecycle with Visual Studio 2010 and TFS.
3:15 PM
Dev Nambi
Database Development: Keep It Agile, Not Fragile.
4:30 PM
Rick Morelan
Basic Performance Tips and Gotchas.

After my presentation I was able to enjoy several other sessions.

Mark Simms (@mabsimms) - The Elephant in the Room (Hadoop for DBAs)

Donabel Santos (@SQLbelle) - SQL Server Reporting Services - Beyond the Basics

Aaron Nelson (@SQLvariant)- PowerShell for **Data Professionals**

Kevin Kline (@KeKline) - Top 10 Admin Mistakes on SQL Server

Here is one of my mementos for the day.

Thanks everyone for all the great feedback.

All of the content was great today. Thanks to Microsoft for hosting this event on their campus.

Now to start preparing for SQL Saturday in Vancouver in March.
