SQL Server Health Reports - Updated

In preparation for my presentation at SQL Saturday in Vancouver BC tomorrow, I have updated the SQL Server Health Reports.

As I was preparing for my presentation I discovered a few areas that I wanted to improve on the layout, sorting and overall presentation.

Too late for the presentation tomorrow, but I started on the next new report to add into the SQL Server Health Reports, the Top 20 SQL Statements by CPU Time will be done before the end of the weekend.
