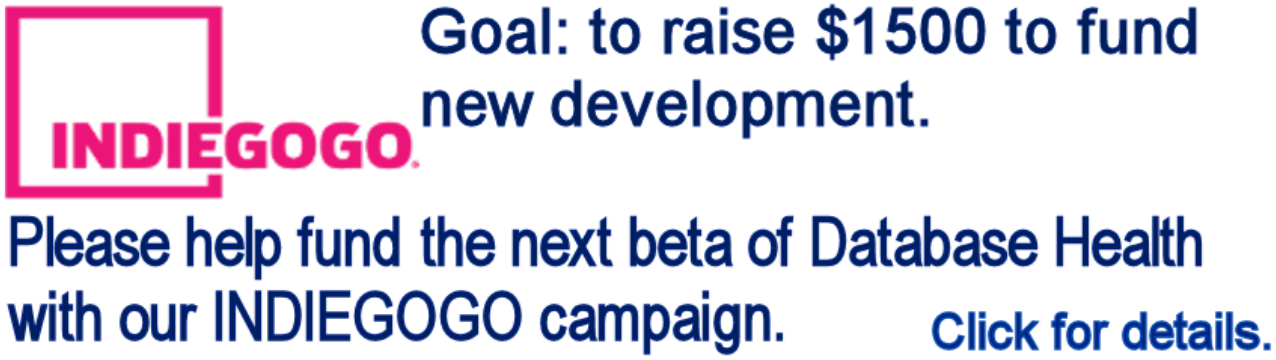
Help Support The Database Health Project

Due to the increased demand on my time to complete the next beta of Database Health Monitor, I have created an IndieGoGo campaign to help fund the next beta version. If you haven't heard of IndieGoGo, its sort of like KickStarter, it is a crowd funding site. Please give something if you can to help me fund the next beta release. http://igg.me/at/DatabaseHealth11



Any help towards my goal for the next beta would be greatly appreciated.
