TSQL to Determine Plan Cache Size

In SQL Server 2012, there was a change to the dynamic management view that reports on the plan cache, so the query has changed. Here are the before and after queries to determine the plan cache size in SQL Server 2012, and prior to SQL Server 2012.

SQL 2012 Plan Cache Size

Pre-SQL 2012 Plan Cache Size

For more details on the plan cache, one time use queries and queries needing parameterization, see the Database Health Project.
