2 Sessions Accepted for SQL Saturday 166 in Olympia Next Month.

I just found out that two of the sessions that I proposed for SQL Saturday #166 in Olympia next month have been accepted. These presentations are:

- Exploring TSQL Enhancements in SQL Server 2012
- Unleashing Common Table Expressions in SQL Server

These are both presentations that I have given before and have had lots of fun with. This should be a good time.

The CTE presentation will be fresh in my mind for Olympia as I will have be presenting it in Portland Oregon the week before.

Also, please try out the Database Health Reports.
