# End of DBCC Command Month

As the month of May comes to an end so does DBCC command month at SteveStedman.com.

I didn't cover all the DBCC Commands this month, but here is what I did have time to cover:

- May 1st - DBCC CheckAlloc
- May 2nd - DBCC CheckCatalog
- May 3rd - DBCC CheckConstraints
- May 4th - DBCC CheckDB
- May 5th - DBCC CheckFilegroup
- May 6th - DBCC CheckIdent
- May 7th - DBCC CheckTable
- May 8th - DBCC CleanTable
- May 9th - DBCC DBReIndex and the proper defragmentation of indexes.
- May 10th - DBCC DropCleanBuffers
- May 12th - DBCC FreeProcCache
- May 13th - DBCC FreeSessionCache
- May 14th - DBCC FreeSystemCache
- May 15th - DBCC Help
- May 16th - DBCC IndexDefrag and what to use for proper defragmentation after SQL Server 2000.
- May 17th - DBCC InputBuffer (How to see what T-SQL others are running).
- May 23rd - DBCC OutputBuffer
- May 24th - DBCC ShrinkDatabase (someone sent in a quote "every time you you run DBCC ShrinkDatabase a kitten dies").
- May 25th - DBCC ShrinkFile
- May 27th - DBCC SqlPerf

That's a total of 20 posts for the month of May on DBCC Command. I wish I had time to do more, however I did attend a SQL Saturday, and my Common Table Expressions book did launch this month too. It has been a busy month.

Next month is Common Table Expressions month at SteveStedman.com.
