

## Podcast Episode 79: SSIS Catalog with Andy Leonard

T

In this week's episode we are pleased to host Andy Leonard to discuss his thoughts on the catalog and how this feature provides some really interesting benefits for ETL architecture. Although the SSIS Catalog DB is created with management studio, it does not behave like other databases. Our conversation in this episode revolves around the catalog, SSIS packages, and some of the complexities of migrating packages.

### Episode Quote

"[The SSIS Catalog] is really there to facilitate a lot of Enterprise functionality that is needed in any data integration engine you use."
