

SQL Compañero

If you have listened to the [SQL Data Partners Podcast](#) where Carlos Chacon and I are the co-hosts of the show, you have probably heard us use the term SQL compañero. In case you are wondering where the term comes from and why we use it, Carlos has put together a short video explaining the SQL compañero term.

And if you haven't listened to our latest podcast on indexing, you might want to check it out. The latest is part 2 in a 2 episode series on Indexing on SQL Server - Indexing Podcast ([Part 1](#), [Part 2](#)).

I hope to see you on the SQL Trail.
