

## I'm Presenting at the Compañero Conference In October

I am excited to announce that I will be speaking at (and helping organize) the SQL Conference called [Companero Conference](#) in Norfolk VA on October 4th and 5th 2017.

### SQL Server Conference for the Accidental, Lone or New DBA

The Compañero Conference is a two-day DBA centered conference bringing together an amazing network of professionals to help you get actionable information and have fun all at the same time.

As you know from our podcast, we love to mix our desire to learn more about SQL Server with a few laughs and make new friends at the same time. We want to bring this idea to the conference and we hope you will join us.

While we can all learn something, this conference is geared towards DBAs that alone in their organizations, accidentally came upon taking care of a database or have responsibilities beyond SQL Server. While there will be plenty of SQL Server, we want to include other topics you will need to help you be as successful as possible.

Over the next week or two we will be announcing other presenters for the conference. It looks like it is going to be a great conference.

I hope to see you there.
