Database Health Beta 8.2 has been released

For everyone using Database Health, sorry for the delay, other projects have been keeping me far to busy.

Today I released an update to Database Health called Beta 8.2. For those attempting to use Beta 8.1, please upgrade, and this should get you going again.

The download is available at:
http://databasehealth.com/download/

Also this one never expires, so nobody should run into the timeout issue again.

Enjoy!

-Steve
