Bellingham SQL Server Users Group - Building a Static Data Warehouse Server

Please help spread the word to anyone who may want to attend this free users group meeting and presentation.

The November meeting of the Bellingham SQL Server Users Group (PASS Chapter) will be held on Wednesday November 18th at 6:00pm.

Welcoming Ron Talmage from SolidQ with his presentation on Building a Static Data Warehouse Server.
The agenda for the meeting will be:

- Welcome and Pizza
- Chapter news and announcements
- Technical presentation (Ron Talmage)
- Socialize and networking

The chapter meeting will be at the following address. Thanks to Derrick Bovenkamp for providing the location for this meeting.

709 West Orchard Drive #4
Bellingham, WA 98225

This is the office right next to Jeckyl and Hyde Ale House on Orchard Drive.
For any questions, please contact Steve Stedman (360)610-7833

Featured presentation:

Building a Static Data Warehouse Server

Sometimes users require underlying data to be static and unchanging. In this session we'll examine steps used to create a static server from a copy of a live data warehouse server, including implementing clustered columnstore on large partitioned tables, simplifying the management of files and filegroups, and reclaiming large amounts of database space.

Presented by Ron Talmage - Mentor and Co-founder, SolidQ

Ron is a mentor and co-founder with SolidQ. He is a SQL Server MVP and current chapter leader of the Pacific Northwest SQL Server Users Group. He has authored numerous SQL Server white papers and contributes to SQL Server technical publications.
