What others think about Database Health Monitor

Steve and The Team care very much about your experience with Database Health Monitor! We listen and consider each upgrade request suggested and updates are released consistently!

Our dedication to this tool is real and it shows!

Read from real users their thoughts on Database health Monitor:

```
Excuse my language but that's bloody amazing - it's  instant! Wow, good w
ork :) The entire application is so much more responsive, can't  believe
it. The new colour is fantastic too, really changes  the whole 'quality'
feel of the application.

Database Health.

This is a great application for SQL Server DBAing. We have a web based product but this one is so comprehensive, both high level and detailed. So much is available right at the click of a button, it is amazing! I am so grateful for the application, for the effort to build it, and the decision to share it. I know it has made me a better DBA, my organization has benefited from it, and I deeply appreciate all of that! Thank you! – Jesse

New version looks great, works more smoothly than ever and has some really great features!
