Database Health Monitor Bundle

With over 11 years of development into Database Health Monitor, there are many features there for many difference scenarios from performance to security, to overall server health.

Months ago, I created the Database Health Monitor course to help people get the most value out of using the product, and with the purchase of that course you also get licensing for up to 20 SQL Servers (connection points).

For several years Stedman Solutions has been doing mentoring, were we help you learn specific SQL Server topics.

Today we are launching a new product combo, two **"great tastes that go great together".**

Database Health Monitor with 2 hours of Mentoring Package.

>>>This combo package is one of the fastest ways to get up to speed with Database Health Monitor.

What you receive with the purchase is:

- 2 hours of mentoring for Steve or a Stedman Solutions team member, specifically on how to use Database Health Monitor in your specific environment.
- Hours of online instruction from the Database Health Monitor course.

- 20 connection points for Database Health Monitor for connections up to 20 SQL Server instances.

With the combination of online videos, and the one on one mentoring you will be able to get the most out of Database Health Monitor.
