SQL Server Mentoring - Do you need a hand?

Sometimes we all need a little help without a long term commitment. That why we created our SQL Server Mentoring service at Stedman Solutions.

SQL Server Mentoring is a training / consulting option for those who just need a little help or direction. This is a cost-effective approach for those who need just a little help. Some call it coaching, others call it micro consulting,but its all basically the concept of having someone you can turn to for those quick questions that don't require a full on consulting arrangement.

With our mentoring package, you can make use of the skilled team at Stedman Solutions to help with your specific needs without any long term commitment.

- Need some help performance tuning a query? we can help.
- Need some help with Database Health Monitor? we can help.
- Need some help turning on TDE encryption on your SQL Server? We can help.
- Need some help planning a SQL Server upgrade? we can help.
- Whatever you need help with relating to SQL Server we can help.
- Unused prepaid mentoring time never expires.
