50% off TSQL JOIN Types class

As the last day of November, today is the last day that I will be promoting specials for our SQL Server training courses. Today's promotion is 50% off the SQL Server JOIN Types class.

The JOIN Types class is our best selling class and will teach you all the ways to connect tables using different types of JOINs. In this course, we will cover: basic select, inner join, left outer join, right outer join, semi join, anti semi join, left outer join w/ exclusion, right outer join with exclusion, full outer join, cross join, cross apply, outer apply, equi vs non equi join, two inner joins, full outer join w/ exclusion, inner and outer join, except, intersect and union. Everything that you ever wanted to know about joins but were afraid to ask.

This promotion is valid through end of day today.

Here is the direct link to the class using the coupon code, valid through November 30th. You can get the JOINs course for just $14.99.
