# Black Friday Promotion 25% Off Track Blocking Queries with Coaching

This promo is more than just a class, it also includes 2 hours of coaching by Steve Stedman.

The track blocking queries script combined with 2 hours of coaching is a great way to get a grasp on the monitoring that you need to catch the queries that are clogging up your SQL server the most.

This is more than just a course, enrollment in the course also gets you access to our track blocking queries script, and training on how to use it. This is script that runs as a SQL Server agent job and over time catches blocking and logs it to a table. With this it gives you the ability to go back and find out what query is causing the blocking, and what is being blocked. If you have occasional or frequent blocking on your SQL Server and you want to find out what the cause is, then this class and included script can help you.

Here is the direct link to the class using the coupon code, valid through November 25th.
