Database Health Monitor Monthly Training + Q&A for March

Coming up before you know it is our March training webinar!

Improve you knowledge and skill set with this FREE Database Health Monitor training and Q&A. This training will be held every month on different days of the week and times so to fit a variety of schedules. Steve will demonstrate tips, tricks and features of this power house tool. Each month he will cover a different topic which will be followed by your questions.

Database Health Monitor is a powerful performance monitoring and diagnostics solution that shows administrators server health, performance or availability problems within their SQL Server environment, all from a central console. If you haven't already, you can download Database Health Monitor before the next session.

Next session will be held:

Wednesday March 29th from 1:30-2:15pm PST via Zoom.

*Space is limited
