The Everything SQL Server Class Bundle

Hey there, SQL enthusiasts and fellow learners!

Grab your spot and capitalize on our special pricing.

I'm genuinely excited to share something I've been working on: the **Everything SQL Server Bundle**. Whether you're just embarking on your SQL journey or you're already deep into the SQL world, I believe this bundle will add significant value to your learning curve.

Inside the Bundle:

I've poured in countless hours to ensure this bundle is both comprehensive and relevant. Here's what's included:

- **SQL Server Interview Questions for DBA's and Developers** - Arm yourself for those big interviews.
- **Preparing for Corruption on SQL Server** - Ensure you're always prepared for the unexpected.
- **Using Database Health Monitor** - A deep dive into monitoring and ensuring your database's peak performance.
- **Microsoft TSQL JOIN Types** - Understand the nuances of JOINs in SQL.
- **Learning Common Table Expression in SQL Server** - Dive into the intricacies of CTEs, one of my favorite topics!
- **Using the TSQL Output Clause** - A practical guide to leverage this powerful clause.
- **SQL Server Backup and Restore** - Essential knowledge for any serious SQL professional.
- **Getting Started with SQL Server** - If you're newer to SQL Server, start here.
- **Aggregating Data In Your SQL Queries** - Efficiently consolidate and interpret your data.
- **Ransomware Awareness Course** - An absolute must in today's digital age.
- **Track Blocking Queries - with Email Alerts** - Because staying updated is crucial.

Bonuses, because who doesn't love them?

And if that's not enough, enrolling now will also get you:

- An exclusive copy of my **Common Table Expressions e-book**.
- A handy **Joins Poster** to keep by your desk.
- Full licensing for the **Database Health Monitor** up to 20 servers.

Wrapping up...

I've designed this bundle with a simple aim: to share the knowledge I've accumulated over the years in a structured and comprehensive manner. I genuinely hope you'll find it as valuable as I believe it is. If you're as excited as I am, let's embark on this SQL journey together. Enroll now!
